SUMMARY

Computer Science student at Al Hussein Technical University (expected 2027) with hands-on experience building and deploying full-stack products across customer experiences, operational dashboards, APIs, and relational databases. Proficient in React, Next.js, Node.js, Express, PostgreSQL, and RESTful APIs, with a strong foundation in clean code, design patterns, and practical problem-solving.

PROJECTS

BMW Rental Management Web Application *React · Node.js · Express · PostgreSQL · [Live](#)*

Deployed vehicle-rental platform with fleet browsing, date-based reservations, secure authentication, and admin approvals through a React client and Express/PostgreSQL API.

Violet Spring Beauty Center *React · Node.js · Express · PostgreSQL · [Live](#)*

Production salon platform for customers, employees, reception, and admins, with conflict-safe booking, staff scheduling, WhatsApp hand-offs, ratings, and revenue reports.

Moment Coffee Platform *React · Node.js · PostgreSQL · GSAP · RTL · [Live](#)*

Bilingual coffee platform combining a branded customer experience, live menu, POS, and QR drive-thru ordering with responsive RTL support and GSAP interactions.

Nadif Dry-Cleaning Management System *React · Node.js · Express · PostgreSQL · [Live](#)*

Bilingual multi-tenant platform with isolated laundry workspaces, customer and garment records, order/payment workflows, operations dashboards, and first-party authentication.

Vehicle Management System (VMS) — King Hussein Business Park *C · HTML · CSS · JavaScript*

Built a C gate-access system with hash tables and doubly linked lists across nine entities, including CRUD, CSV persistence, audit logging, locking simulation, and a browser portal.

Vehicle Access Management System *Java · JUnit*

Backend access-control system using Factory, Facade, and Strategy patterns with validation and JUnit tests, demonstrating strong OOP and SOLID principles.
